Please find below and/or attached an Office communication concerning this application or proceeding.

	Application No.	Applicant(s)				
	09/806,140	SCHENK, HEINRICH				
Office Action Summary	Examiner	Art Unit				
	DON N VO	2631				
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Oath/Declaration

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because **the date** when signing the Declaration is omitted.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Strait (6,26,367).

Strait, as shown in figure 3, teaches a discrete multitone modulation system including receiver comprising A/D converter (206) (column 5, lines 36-42) and time-domain equalizer (310, 314) including digital filter having fixed coefficients. See column 3, lines 51-55; column 5, line 1 to column 6, line 50; column 7, lines 10-13; and column 8, lines 24-28.

Application/Control Number: 09/806,140 Page 3

Art Unit: 2631

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 2-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Strait (6,266,367) in view of Jar-Ferr et al (5,857,000).

Regarding claims 2-4, 6 and 7, Strait teaches all subject matter claimed except for particularly pointing out implementing the fixed coefficients timedomain equalizer having shift operation, subtraction and addition circuits and integer values for fixed coefficients. However, Jar-Ferr et al (5,857,000) teaches implementing the fixed coefficients time-domain equalizer having shift operation, subtraction and addition circuits and integer values for fixed coefficients in order to improve the precision and also to reduce the amount of computations. See figs 1-6; column 3, lines 1-30; column 4, lines 47-59; column 5, lines 21-57; column 6, lines 29-40; column 16, lines 50-67; and column 17, lines 41-67. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to employ the teaching of Jar-Ferr et al for implementing the fixed coefficients time-domain equalizer of Strait so that to improve the precision and also to reduce the amount of computations.

Application/Control Number: 09/806,140

Art Unit: 2631

Regarding claim 5, Strait further teaches that the digital filter can be modeled as low pass, high pass or band pass type depending on the type of noise that needs to be filtered.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. References Yang et al (6,401,107), Pollet et al (6,553,066) and Liu et al (6,674,795) are cited because they are pertinent to time domain equalizer for DMT system.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to DON N VO whose telephone number is (571) 272-3018. The examiner can normally be reached on TUE - FRI (9:00-6:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, MOHAMMAD GHAYOUR can be reached on (571) 272-3021. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
